SARASIN TECHNICAL ASSEMBLER & REPAIR  
Trillium Flow Technologies™

**SARASIN-RSBD®**  
Pressure Safety Devices

**STAR Service Centers**

## Sarasin Technical Assembler & Repair

A dedicated partner for your Pressure Relief Valve's full lifecycle needs.

## Sarasin-RSBD® Pressure Relief Valve Local Partner

Sarasin Technical Assembler and Repair (STAR) service centers from Trillium Flow Technologies provide pressure relief valve (PRV) OEM aftermarket support for industrial plants and facilities in North America. Each STAR service center is strategically located to deliver exceptional support to our customers locally by providing rapid response and high-quality service for valve repair and replacement. Our STAR service centers are here for you, whether it is routine or unexpected PRV maintenance.

### Technically Certified and Authorized

Each STAR service center has been approved by the National Board of Boiler and Pressure Vessel Inspectors to perform PRV testing and repair per ASME codes. Additionally, these centers/facilities have been evaluated and approved by Trillium Flow Technologies for assembly and repair of the Sarasin-RSBD line of PRVs, which has over 170 years of PRV expertise in the marketplace. Audits are scheduled annually to ensure the best-in-class service and quality for our customers and to verify each center is following our highest standards for newly assembled and repaired PRVs. Training is also conducted regularly for the sales teams and technicians at each STAR service center to ensure our customers receive PRV selection and troubleshooting expertise.

### Assemblers Ready to Serve

Trillium Flow Technologies has created a network of assemblers dedicated to providing what you need – when you need it. Each STAR service center can assemble, set, and test Sarasin-RSBD® of PRVs on gas/air, liquid, and steam. Most of our product lines come standard with universal trim, reducing complexity in design and inventory so that we can better serve you, fast. It is each center's goal to connect with you for a better understanding of your inventory needs. Whether you have a planned replacement or an emergency, our centers are ready to support you with our vast network of nationwide STAR service centers.

### Repair Shops for All PRVs

PRV maintenance and repair is usually planned during turnarounds or outages but often unplanned, resulting in increased downtime and operating costs. In these cases, it is essential that industrial users can have a trusted partner that offers valve repair capabilities and on-time service. Each one of our STAR service centers are certified valve repair shops and not just for Sarasin-RSBD® products but any manufacturer's brand of PRVs, including but not limited to Anderson Greenwood, Crosby, Consolidated, Farris, and Leser. Whether you have a single valve for service or a large number of valves requiring a complete overhaul, a STAR service center offers the resources, skills, and experience to complete your job efficiently, expertly, and on time.

## Our Mission to Serve

To provide rapid, knowledgeable support with the right quality products, on time.

- **Provide rapid support**

to reduce end-user process downtime resulting in cost savings in the thousands/millions of dollars. Our STAR customer service teams are on standby, ready to serve our clients and get their processes operational as soon as possible. The STAR centers achieve this through:

- Localized Inventory and Service Teams
- Dedicated Customer Service Teams

- **PRV expertise**

to assist in sizing and selecting the best PRV technology for our client's specific application. Even if you have a reoccurring issue, our STAR technicians are highly skilled and trained to help identify the root cause of any manufacturers' PRV to provide a cost-effective solution.

- **Quality products**

that can withstand our client's process conditions, and prolong the need for routine maintenance, saving money over the full lifecycle. Each STAR service center offers quality products that meet ASME, manufacturer, and customer requirements. Sarasin-RSBD® products are recognized globally for their high quality, innovative design, and durability.

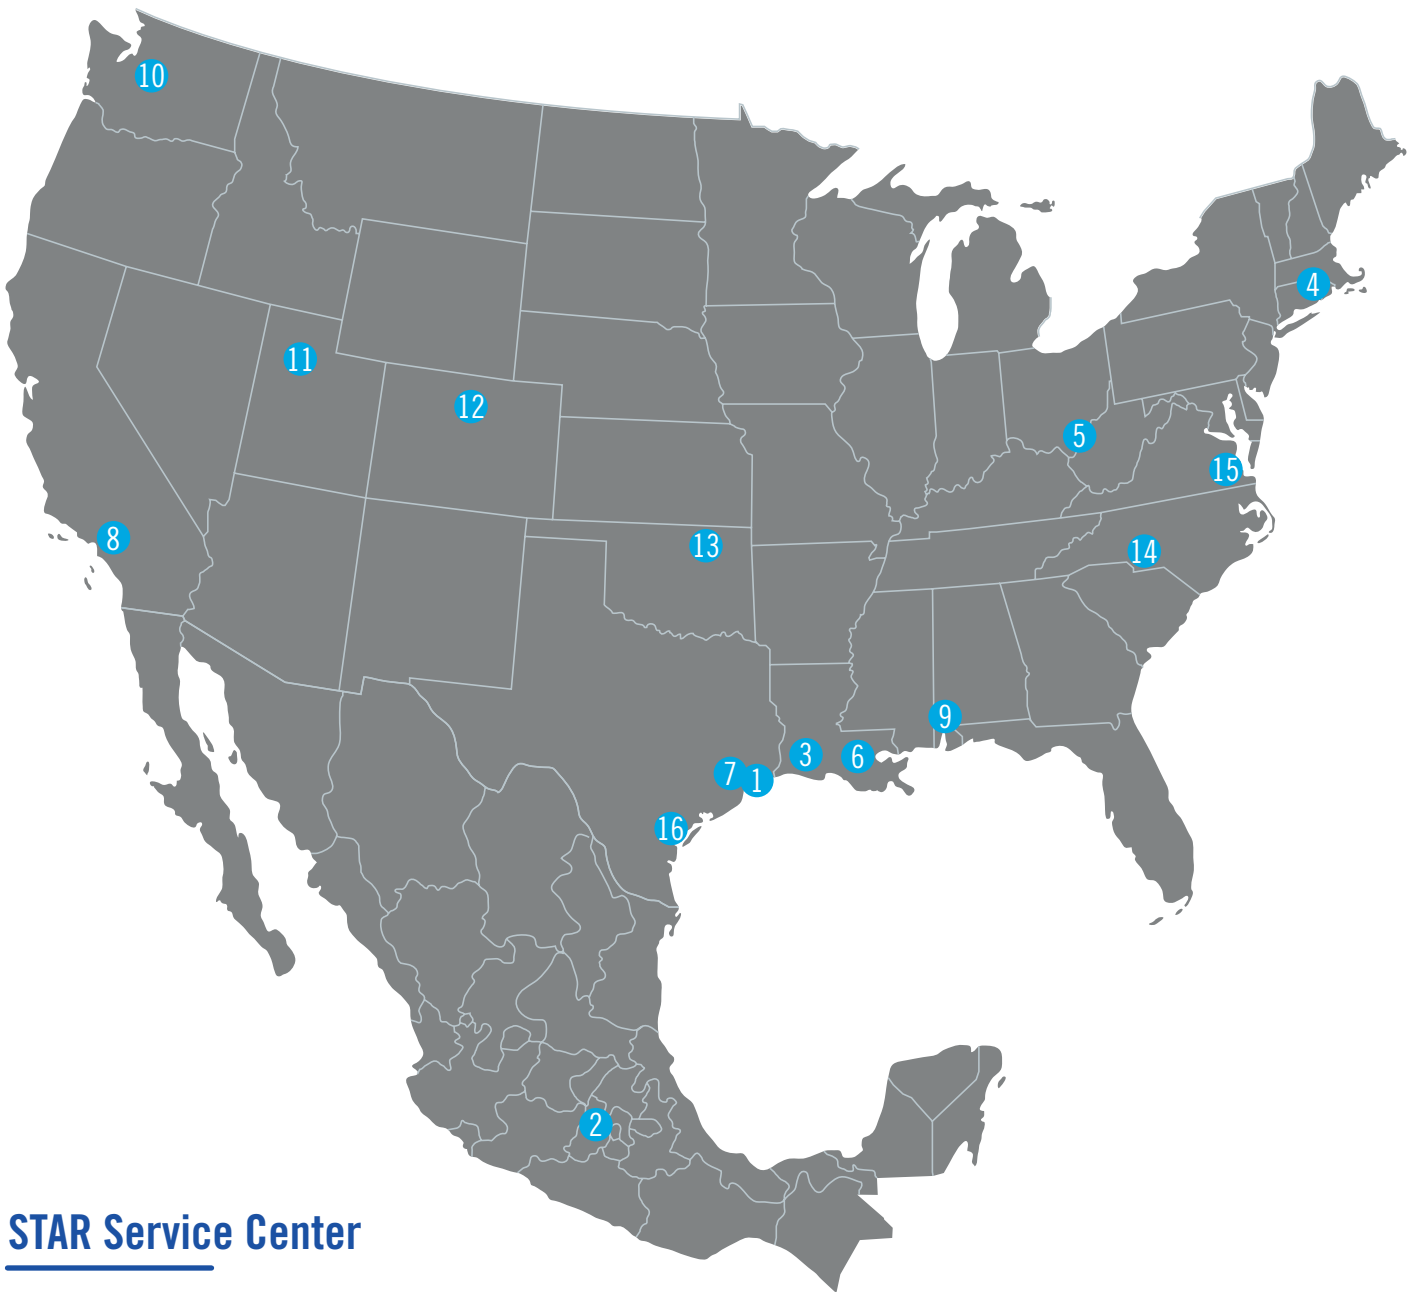

## Trillium Flow Technologies' Qualification of STAR Service Centers Partners

- ASME and VR Certification from the National Board
- Authorized and approved by Sarasin-RSBD® plant/factory
- Factory-trained service technicians for PRV repair and assembly
- PRV inventory for emergency replacements or planned turnarounds
- OEM inventory for replacement parts
- Asset management tools for tracking PRV maintenance and repair history
- Quality control manual and system
- Test stands for setting new and repaired PRVs
- Sales team trained on Sarasin-RSBD® PRVs to provide technical support
- Inside sales team trained by the factory to size and select PRV types
